

Bio Mix

Maximize Performance

Each 1 Kg contains

Cellulase	100,000,000 unit
Xylanase	11,100,000 unit
Amylase	125,000 unit
Phytase	1,200,000 unit
Lipase	10,000 unit
Pectinase	30,000 unit
Protease	3,700,000 unit
Beta Glucanase	2,50,000 unit
Beta Mannanase	1,50,000 unit

Benefits (Helps) :

- Increase the digestibility of feed stuff.
- Improve the FCR.
- Increase the egg production.
- Improve the bioavailability of Carbohydrates, Fats, Proteins and Phosphorus.
- Optimize the Protein digestion, thus increasing the proportion of Digestible Protein in the feed.
- Helps in the release of Phytate bond phosphorus and other minerals and decreases the inclusion rate of inorganic phosphorus.
- Cost-effective feed formulation which in turn decreases the cost of production.
- Reduces gut viscosity ammonia levels and loose droppings.

Suggestive Usage :

350 to 500 gm / tonne of feed.
or as directed by Veterinarian.

Presentation : 1 Kg, 5 Kg, 25 Kg
